SUMMARY

Seasoned technical lead with 14+ years of experience in full-stack development and software architecture. Proven expertise in managing the complete software development lifecycle, leading development teams, and implementing scalable solutions. Extensive experience with React Native, TypeScript, and RESTful APIs. Eager to contribute to Crossing Hurdles as a Software Engineer, leveraging technical skills and innovative solutions.

EXPERIENCE

Scoutz, **SOFTWARE ARCHITECT**

Feb 2024 - Present

- Architected and deployed scalable applications using MERN/MEAN stacks and Next.js, enhancing system performance and scalability.
- Implemented cloud platform solutions with AWS, optimizing performance and ensuring seamless integration.
- Led development teams through complete project life-cycles, aligning technical and business objectives to deliver dynamic web and mobile applications.

MAJR Creators (Remote), **FULL STACK ENGINEER**

Apr 2023 - Jan 2024

- Managed ongoing development processes, including requirements gathering, design, and implementation
- Integrated multiple APIs, including OpenAI, Stripe, and Printful to extend application functionality
- Implemented Web3 technology for smart contract integration and blockchain interactions
- Utilized modern tech stack: Next.js, Prisma, PostgreSQL, MongoDB, TypeScript, React.js
- Led end-to-end development lifecycle ensuring smooth execution from requirements to deployment • Implemented CI/CD processes using Vercel and SonarCloud for seamless deployment and code quality assurance

FullStack Labs, **SOLUTIONS ARCHITECT**

Oct 2022 - Apr 2023

- Oversaw development of cross-platform projects, including frontend, backend, and mobile applications
- Introduced Test-Driven Development (TDD) methodologies to improve software quality and efficiency • Led development of cross-platform mobile applications using React Native
- Collaborated with product owners to identify requirements, create feature lists, and provide accurate project estimations
- Conducted project meetings to maintain stakeholder alignment and ensure project goal achievement • Delivered high-quality software solutions on time and within budget

Nextbridge Ltd., **PROJECT MANAGER**

Oct 2020 - Oct 2022

- Managed and mentored development teams while providing technical guidance
- Conducted technical interviews to build talented workforce
- Effectively managed project timelines and budgets for timely, high-quality delivery
- Hands-on development using PHP, React, React Native, Ionic, Angular, Laravel, CodeIgniter, MySQL, NoSQL, Python, and Fastlane
- Played integral role in company growth and development through effective leadership

Nextbridge Ltd., **PRINCIPAL SOFTWARE ENGINEER**

Oct 2016 - Oct 2020

- Provided technical guidance and mentorship to team members
- Conducted technical interviews to build strong development teams
- Managed project timelines and budgets for optimal delivery
- Actively involved in hands-on development using multiple technologies
- Created robust and efficient solutions leveraging diverse technical expertise

Nextbridge Ltd., **SENIOR SOFTWARE ENGINEER**

Nov 2012 - Oct 2016

- Developed web and hybrid applications using PHP frameworks (Laravel, CodeIgniter, Yii)
- Built mobile applications using Apache Cordova/PhoneGap and Ionic
- Conducted detailed analysis of client requirements and delivered customized solutions
- Participated in project management and task estimations for successful project delivery
- Contributed to company reputation as provider of high-quality solutions

*Techliance, **SENIOR SOFTWARE ENGINEER***

Oct 2011 - Nov 2012

- Developed robust applications using PHP and Titanium Appcelerator for mobile platforms
- Maintained effective client communication providing regular feedback and updates
- Collaborated with Project Managers to streamline project progress and deliverables
- Designed architecture for complex applications ensuring scalability and maintainability
- Conducted detailed project estimations aligning resources with client requirements

*SigmaTec Solutions Pvt. Limited, **SOFTWARE ENGINEER***

Jul 2009 - Oct 2011

- Developed high-quality software solutions collaborating with cross-functional teams
- Worked directly with clients to gather requirements and translate them into development tasks
- Delivered tailored solutions aligned with client expectations and specifications
- Provided timely feedback to stakeholders ensuring project transparency
- Demonstrated strong problem-solving skills addressing technical challenges

*Salsoft Inc, **FACEBOOK APPLICATION DEVELOPER***

Aug 2008 - Aug 2009

- Developed and deployed Facebook applications using FBML
- Designed and implemented application campaigns driving user interaction
- Collaborated with clients and marketing teams to align features with campaign goals
- Optimized applications for performance and Facebook platform compatibility
- Ensured compliance with Facebook development guidelines and best practices

EDUCATION

Virtual University of Pakistan

Bachelor of Science in Computer Science (BSCS)

Govt High School, Sangla Hill

Matriculation in Science

LICENSES & CERTIFICATIONS

Neo4j Certified Professional

Building Neo4j Applications with TypeScript

Building Neo4j Applications with Node.js

Upwork Skill Certification - React Frontend Development

Triplebyte Certified

SKILLS

full-stack development • software architecture • project management • MERN stack • MEAN stack • Next.js • cloud platform solutions • AWS • React Native • TypeScript
