About Me

Backend Developer with 1 year of experience at LPSE, specializing in Laravel for building web applications and RESTful APIs. Experienced in developing scalable systems, including school management platforms, procurement data systems, and API integrations. Skilled in performance optimization, database design, and building reliable backend services.

Experience

- LPSE (Jan 2024- July 2025)
- Developed and maintained backend applications using PHP (Laravel) and MySQL as the database
- Built Sicerdas, a school management system covering student data, academic processes, and operational management, using FilamentPHP as the admin panel
- Designed and developed RESTful API for Sicerdas to support intergration with Android and IOS applications
- Contributed to the development and maintenance of the Carikatalog system for procurement data management
- Developed REST APIs for downloading product data from e-katalog version 5 and 6 for Ceklpse System

- Intern at Markaz Design (Dec 2021- Jan 2022)
- Completed a 3-month internship focused on graphic design using CorelDraw, creating visual content tailored for MSMEs (small and medium-sized businesses).
- Worked on branding and Instagram feed designs for multiple clients, including Cossy Deo (deodorant), Monster (chicken intestine chips), and CNC (water tank cleaning services). Delivered designs aligned with each brand's identity to support their marketing and online presence.

Projects

- Sicerdas
- Carikatalog
- Ceklpse
